

Sunspot Fake of September 11, 2026

by Miles Mathis

I thought this would be good day to do another one. The miscount is absolutely horrific every day, but today was as obvious as any, and I can now do these in my sleep. Six years of this fraud from Air Force/SWPC and another five to go, in this cycle alone.

14521	2026-08-30 2026-08-31	1	4	1	N09W67	0670	H5X	CSO			was AR S12327 location: N09W66
14523	2026-08-31				N10W56						computational mistake by SWPC/USAF. Obviously the trailing spot of AR 14
14524	2026-08-02 2026-08-02	1	7	3	N12W27	0040	H5X	CAD			was AR S12334 location: N12W26
14526	2026-08-03 2026-08-04				S02W14						was AR S12338 location: S02W09
14527	2026-08-03 2026-08-04	3	12	6	N04W05	0580	H5X	CHD			was AR S12339 area: 0320 location: N03W05
14528	2026-08-03 2026-08-04	5			N11W10	0020	CHI				was AR S12340 spotless location: N10W16 apparently SWPC has moved this AR to the location of AR S12333

So, count em up: that's at minimum 180 they wiped, so the count today should have been not 90, but 270. And that's not even close to the worst we have seen.
